

Beacon Hill Youth Soccer Website

Sanity CMS Architecture v1.0

Purpose

Define the Sanity CMS content model for the BHYS website.

The CMS should be simple, volunteer-friendly, and structured enough to avoid the site becoming difficult to maintain over time.

CMS Principles

Keep It Simple

Avoid a complex page builder.

Use structured content types that are easy for volunteers to understand.

Make Seasonal Updates Easy

Registration links, season dates, alert banners, and donation links should be editable without developer support.

Keep Platform Links Configurable

Registration and donation platforms may change over time.

The website should allow key URLs to be updated in Sanity.

Support Future Growth

The CMS should support news, sponsors, FAQs, board members, and registration guides without redesigning the site.

Content Types

1. Site Settings

Single document.

Used for global site configuration.

Fields

- Site Name
- Current Season
- Main Registration URL
- Fall Registration URL
- Spring Registration URL
- Donation URL
- Volunteer Form URL
- Sponsor Enquiry Form URL
- Contact Email
- Instagram URL
- Facebook URL
- Alert Banner Enabled
- Alert Banner Text
- Alert Banner Link

Notes

This is the most important non-page content type. It allows BHYS to update seasonal and platform-specific information without code changes.

2. Homepage

Single document.

Used to manage homepage content.

Fields

- Hero Headline
- Hero Supporting Text
- Hero Image
- Primary CTA Label
- Primary CTA Link
- Secondary CTA Label
- Secondary CTA Link

- Registration Section Title
- Registration Section Text
- About Section Title
- About Section Text
- Donate Section Title
- Donate Section Text
- Volunteer Section Title
- Volunteer Section Text
- Featured News Limit
- Featured Sponsors Limit

Notes

The homepage should be structured rather than fully freeform. This keeps the page easy to update and prevents layout drift.

3. Pages

Used for general static pages.

Examples:

- About
- Volunteer
- Resources
- Donate
- Sponsors
- Contact

Fields

- Title
- Slug
- Hero Title
- Hero Text
- Hero Image
- Page Summary
- Main Content
- Call To Action Label
- Call To Action Link
- SEO Title
- SEO Description

Notes

This is for standard content pages only. The Register page may use a dedicated content type or structured page template because it is more important.

4. Registration Guides

Used for registration help content.

Examples:

- Age Groups Explained
- Fall vs Spring Soccer
- Scholarships & Financial Aid
- How to Register
- Special Requests
- Using the Team App

Fields

- Title
- Slug
- Summary
- Category
- Hero Image
- Main Content
- Related FAQs
- Primary CTA Label
- Primary CTA Link
- Sort Order
- SEO Title
- SEO Description

Categories

- Age Groups
- Fall Soccer
- Spring Soccer
- Scholarships
- Registration Help
- Team Communication

Notes

This content type is important because Larry identified registration confusion as a major source of support requests.

5. FAQs

Used for frequently asked questions.

Fields

- Question
- Answer
- Category
- Related Page
- Related Registration Guide
- Sort Order
- Active

Categories

- Registration
- Scholarships
- Parents
- Coaches
- Volunteers
- Weather
- General

Notes

FAQs should be reusable across pages.

For example, scholarship FAQs can appear on both the Register page and Donate page.

6. News Articles

Used for announcements and archive content.

Examples:

- Tournament results
- Sponsor announcements
- Registration updates
- Community stories

Fields

- Title
- Slug

- Publish Date
- Excerpt
- Featured Image
- Category
- Main Content
- Featured
- SEO Title
- SEO Description

Categories

- Registration
 - Club News
 - Community
 - Sponsors
 - Tournament Results
-

7. Sponsors

Used to manage sponsor recognition and sponsor pages.

Fields

- Sponsor Name
- Logo
- Website URL
- Sponsorship Level
- Description
- Active
- Featured On Homepage
- Display Order

Sponsorship Levels

- Premier Sponsor
- Community Sponsor
- Supporting Sponsor
- Partner

Notes

Sponsor levels can be adjusted later once BHYS defines a formal sponsorship prospectus.

8. Board Members

Used to manage board and leadership content.

Fields

- Name
- Role
- Photo
- Biography
- Email
- Display Order
- Active

Notes

Email can be optional. If used, it may be better to show role-based email addresses rather than personal emails.

9. External Links

Used for reusable external links.

Examples:

- SYSA Field Locations
- Weather Guidance
- Air Quality Guidance
- SYSA Rules
- OttoSport
- Future Registration Platform

Fields

- Title
- URL
- Description
- Category
- Active
- Display Order

Categories

- Registration
- SYSA
- Weather

- Coaches
- Fields
- Safety

Notes

This prevents important external links from being hardcoded across multiple pages.

Recommended CMS Structure

Sanity Studio navigation should be organized as:

Global

- Site Settings
- Homepage

Website Pages

- Pages
- Registration Guides
- FAQs

Updates

- News Articles

People & Partners

- Sponsors
- Board Members

Links

- External Links
-

Initial Content Needed

Site Settings

- Registration URL
- Donation URL

- Contact email
- Social links
- Current season

Homepage

- Hero headline
- Hero text
- CTA labels
- Intro copy
- Donation copy
- Volunteer copy

Registration Guides

Minimum launch set:

- Age Groups Explained
- Fall vs Spring Soccer
- Scholarships & Financial Aid
- How to Register
- Special Requests
- Using the Team App

FAQs

Minimum launch categories:

- Registration
- Scholarships
- Parents
- Coaches

Sponsors

- Sponsor names
- Logos
- URLs
- Sponsorship level

Board Members

- Name
- Role
- Optional photo
- Optional bio

Technical Notes

Slugs

The following content types require slugs:

- Pages
- Registration Guides
- News Articles

SEO

The following content types should include SEO fields:

- Pages
- Registration Guides
- News Articles

Images

Images should include alt text wherever possible.

Rich Text

The following content types require rich text:

- Pages
- Registration Guides
- News Articles
- FAQs

Ordering

The following content types require manual ordering:

- Registration Guides
 - FAQs
 - Sponsors
 - Board Members
 - External Links
-

MVP CMS Build Order

Step 1

Create core schemas:

- Site Settings
- Homepage
- Pages

Step 2

Create registration support schemas:

- Registration Guides
- FAQs
- External Links

Step 3

Create community schemas:

- News Articles
- Sponsors
- Board Members

Step 4

Configure Studio structure.

Step 5

Add sample content.

Future CMS Enhancements

Potential future content types:

Sponsorship Packages

If BHYS creates formal sponsor levels.

Merchandise

If BHYS begins selling scarves or club merchandise.

Photo Gallery

If BHYS creates a reusable photo archive.

Translated Guides

If BHYS creates official translated registration guides.

Recommendation

Proceed with this structured Sanity CMS model.

It is simple enough for volunteers, flexible enough for future growth, and avoids the complexity of a full page builder.
