Purpose

This document establishes the visual direction, user experience principles, and homepage structure for the Beacon Hill Youth Soccer website.

The objective is to create a modern, community-focused website that supports registration, volunteers, donations, and sponsorships while remaining simple for volunteers to manage.

Design Principles

Every design decision should support one or more of these principles.

Registration First

The primary purpose of the website is to help families successfully register their children.

Registration should be visible and accessible from every page.

Community Focused

BHYS is more than a soccer club.

The website should reflect:

- Community
- Inclusion
- Accessibility

- Diversity
- Volunteerism

The website should feel welcoming rather than competitive.

Mobile First

Most users will access the site from mobile devices.

Design decisions should prioritize:

- Large tap targets
 - Clear navigation
 - Fast loading
 - Easy scanning
-

Simple

The website should prioritize clarity over visual complexity.

Avoid:

- Animations for the sake of animations
 - Clutter
 - Excessive navigation
 - Multiple competing calls-to-action
-

Volunteer Friendly

The website must be easy to update.

Editors should be able to:

- Update registration dates
- Publish news
- Change homepage content
- Add sponsors

without developer involvement.

Brand Personality

The website should feel:

Welcoming

Families should immediately feel that BHYS is approachable and community oriented.

Inclusive

The site should visibly represent the diversity of the Beacon Hill community.

Trustworthy

Parents should feel confident registering their children.

Energetic

Youth soccer should feel active and positive.

Local

The site should feel rooted in Beacon Hill and Southeast Seattle.

Visual Direction

Overall Style

Clean.

Modern.

Photo-led.

Bright.

Friendly.

Not corporate.

Not elite sports.

Not tournament-focused.

Think:

"A modern Seattle community organization that happens to run soccer programs."

Color Palette

Photography Direction

Photography will have a larger impact than almost any design decision.

Preferred photography:

Team Photos

Current BHYS teams.

Match Action

Players participating.

Coaches

Volunteer coaches interacting with players.

Community

Families and events.

Diversity

Photography should reflect the community BHYS serves.

Avoid:

- Stock photography
- Professional-looking tournament photography
- Images that feel staged

Authenticity is more important than perfection.

News Cards

FAQ Accordion

Sponsor Logo Grid

Call To Action Banner

Form Components

Rich Text Content Block

Alert Banner

All pages should be assembled from these components rather than custom page-specific layouts.

Mobile Experience

Priority actions must remain visible.

Key principles:

Registration First

Registration CTA visible without scrolling.

Large Buttons

Easy to tap.

Short Content Blocks

Avoid long paragraphs.

Fast Scanning

Use cards, headings, and visual hierarchy.

Accessibility Requirements

Minimum WCAG AA compliance.

Requirements:

- Keyboard navigation
 - Accessible forms
 - Alt text support
 - Color contrast compliance
 - Browser translation compatibility
-

Design Success Criteria

The design will be considered successful if:

- A parent can find registration information within seconds.
 - A visitor understands the BHYS mission immediately.
 - Donation opportunities are clear.
 - Volunteer opportunities are visible.
 - The website feels welcoming and community focused.
 - Mobile experience is excellent.
 - Content remains easy for volunteers to maintain.
-

Recommendation

Proceed with a simple, photography-led, community-focused design that prioritizes registration, volunteers, and scholarships while remaining easy for future volunteers to manage and extend.
